

IN THE CLAIMS:

1026237305 earlier filing (a) or (c)?

1. (Original) Apparatus for permitting sanitary egress from a restroom, the restroom including a door having opposite sides, said apparatus comprising:

a dispenser¹⁰ mounted on one of the sides of the door³¹, the dispenser being adapted to contain and dispense a supply of sheets to a user prior to exiting the restroom; and

a disposal container assembly mounted on the door, the disposal container assembly being adapted to receive the supply of sheets upon exiting the restroom.

A1
2. (Original) Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the side of the door opposite the dispenser.

102
3. (Original) Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the same side of the door as the dispenser.

102
4. (Original) Apparatus as set forth in claim 3 wherein the disposal container assembly is mounted on the door below the dispenser.

102
5. (Original) Apparatus for permitting sanitary egress through a doorway, said apparatus being adapted to be mounted on a mounting member²⁰ including opposite sides, said apparatus comprising:

606
line 58-60
a dispenser¹⁰ assembly adapted to contain and dispense a supply of sheets, said dispenser assembly being mounted on one of the opposite sides of the mounting member, and

34
a disposal assembly adapted to receive the supply of sheets, said disposal assembly mounted on the side of the mounting member opposite the dispenser assembly.

6. (Currently Cancelled)

7. (Currently Cancelled)

X8. (Currently Amended) Apparatus for permitting sanitary egress from a restroom,

said apparatus comprising:

AI cont
a mounting member including opposite sides and a passage communicating between the
opposite sides of the mounting member,

a dispenser assembly mounted on the mounting member and including a first housing portion
adapted to contain and dispense a supply of sheets, and

a disposal assembly mounted on the mounting member and including a second housing
portion defining a container chamber [having a portion extending into the passage,

wherein the dispenser assembly and the disposal assembly are on the same side of the
mounting member, and

~~Apparatus as set forth in claim 7~~ wherein the first housing portion includes a first opening
located on one side of the mounting member, and wherein the second housing portion includes a
second opening located on the side of the mounting member opposite the first opening.

X9. (Original) Apparatus as set forth in claim 8 wherein the first housing portion
includes a removable top.

10. *currently*
(Cancelled)

X²⁰ 11. (Original) Apparatus for permitting sanitary egress from a room having an exit and a mounting member having opposite sides and being located near the exit, the mounting member having extending there through a passage, said apparatus comprising;

a housing adapted to be mounted on the mounting member, the housing defining an interior space and having a portion extending into the passage in the mounting member,

a first opening in the housing,

a second opening in the housing, and

Al
cont
a member located in the interior space and dividing the interior space into a dispenser portion communicating with the first opening and adapted to contain a supply of sheets and into a container portion communicating with the second opening and adapted to receive the supply of sheets.

X 12. (Original) Apparatus as set forth in claim 11 wherein the first opening is on the one side of the opposite sides of the mounting member and the second opening is located on the side of the mounting member opposite the first opening.

X 13. (Original) Apparatus as set forth in claim 11 wherein the portion of the housing extending into the passage includes said second opening.
